Project Manager joins Array's Dallas, TX Office

Dallas, Texas – Array Healthcare Facilities Solutions, nationally recognized as a leader in the design of hospitals and healing environments, is pleased to announce that Karen Allen, CID, has joined the firm as a Project Manager in the firm's southwest office, located in Dallas, TX.

With over 20 years of experience in the design industry, Karen has focused exclusively on healthcare design for the last 15 years. In Texas, Karen has completed projects for Texas Health Harris Methodist Southlake, The Spine Team Texas of Southlake, The University of Texas M.D. Anderson Cancer Center, Methodist Dallas Medical Center, and Children's Medical Center of Dallas, as well as ambulatory care projects for several physician-owned groups.

Karen's national portfolio includes multiple projects at Salem Hospital Regional Health Services in Salem, OR; Methodist Hospital of Southern California, Arcadia, CA; and, University of Maryland Medical Center in Baltimore, MD. Additionally, Karen's experience includes international work for the United States Department of Defense in Europe. She has also taught college-level interior design courses at Bauder College in Arlington, TX.

"Having previously worked with Karen, I have always admired her design expertise, technical precision and client management abilities," comments Marsha Whitt, Vice President of Array's Southwest office. "When the opportunity arose for Karen to join the Array team, I jumped at the chance to augment our firm's strengths with her expertise."

Array Healthcare Facilities Solutions, a planning, architecture and interior design firm dedicated exclusively to healthcare design, recently won an international interior design award for its work at Rainbow Babies & Children's Hospital, Cleveland, Ohio. Array has additional offices in King of Prussia, PA; Boca Raton, FL; Beachwood, OH; and, New York, NY. Visit www.arrayhfs.com and follow ArrayHFS on Twitter.

Karen Allen, CID Project Manager

Karen has experience in all phases of project management as well as practical knowledge of a broad range of project types. With healthcare design Karen's primary focus, she also has been the project designer on many types of projects including corporate, hospitality, government and education. Prior to joining Array, Karen worked as a Senior Project Interior Designer on projects that range from 5,000 to over 1 million square feet, consistently meeting deadlines and designing within project budgets. Through her work on hospital master plans, renovations, medical office buildings, freestanding clinics and total replacement facilities, Karen brings to Array a unique ability to convey design concepts and inspire project teams to develop innovative and functional healthcare environments. While working on a project, Karen will manage a team of designers and their participation from Schematic Design through Construction Administration, providing architectural design, producing Construction Documents, and specifying finishes, furniture and artwork.
