Noah Tolson, AIA, LEED AP BD+C

Principal, Practice Area Leader, Planning

In an industry where efficiency and Lean practices are becoming increasingly important, Noah offers a track record of designing projects that maximize operational efficiency, resulting in significant cost savings for his clients. He excels in the management of in-house, client and consultant teams from initial scope through to construction completion.

He brings over a decade of healthcare-focused experience and brings a broad skill set to facilitate project delivery with a comprehensive understanding of various project types. His diverse architectural experience includes many strategic and design projects for healthcare, academic and corporate clients.

As Practice Area Leader for Planning, he monitors all planning activities within the firm and provides peer reviews of planning deliverables during critical phases of every project. In addition, he leads key strategic and master planning engagements. His creative thinking and fully integrated process aims to always derive the most appropriate architecture solution for his clients.

Representative Projects:

- **Bayhealth Medical Center, Freestanding Emergency Department, Smyrna, DE**
- **Bon Secours Health System, Good Samaritan Hospital, Suffern, NY**
 - Radiology Department
 - Ambulatory Surgery Center

Array Names New Practice Area Leader for Planning

Noah Tolson, AIA, LEED AP BD+C has been named Practice Area Leader for Planning with Array Healthcare Facilities Solutions. In this role, Noah will oversee and manage all planning activities within the firm. He will provide peer reviews of planning deliverables during critical phases of every project. In addition, he will lead key strategic and master planning engagements.

In an industry where efficiency and Lean practices are becoming increasingly important, Noah offers a track record of designing projects that maximize operational efficiency, resulting in significant cost savings for his clients. He excels in the management of in-house, client and consultant teams from initial scope through to construction completion.

Noah brings over a decade of healthcare-focused experience and brings a broad skill set to facilitate project delivery with a comprehensive understanding of various project types. His portfolio consists of architectural, planning, and consulting projects featuring Greenfield hospitals and complex renovations for institutions such as Bayhealth Medical Center, Lucile Packard Children's Hospital, Einstein Medical Center, Englewood Hospital and Sutter Health.

"We are extremely pleased that Noah will be joining Array to head up our planning practice" adds Carl Davis, Array's President. "With hospitals facing reductions in reimbursement rates, Noah's expertise in Lean Design principles and strategic planning allows Array to deliver design solutions that help our clients meet their healing objectives and business goals."

Array focuses exclusively on healthcare design, and is recognized as a leading hospital and medical facility planning, architecture, and interior design firm with offices in New York, Philadelphia; Boca Raton; Cleveland; Dallas and San Francisco.
