Array Adds Senior Healthcare Architect to Firm as Principal

L. Kent Doss, AIA, LEED AP BD+C has joined Array Healthcare Facilities Solutions as a Principal. Kent offers over 20 years of diverse healthcare design and project management experience.

Kent has worked with many of the nation's top healthcare providers including New York Presbyterian Hospital, Weill Cornell Medical College, North Shore Long Island Jewish Health System, Lucille Packard Children's Hospital at Stanford University and The Reading Hospital and Medical Center to deliver projects that support a superior patient and caregiver experience.

In his role as Principal, Kent will be an integral member of key project teams, offering the insight and experience he has gained managing large-scale healthcare projects across the country.

"Healthcare clients today are demanding an improved project experience – not just aesthetically, but also from a project management and delivery perspective. Kent's background in large healthcare project delivery, combined with his hands-on experience with BIM and alternate delivery methods, makes him an excellent addition to Array's management team," said Carl Davis, President. "Kent joining the firm will certainly increase the depth and breadth of our project delivery teams across all our offices."

Array focuses exclusively on healthcare design, and is recognized as a leading hospital and medical facility planning, architecture, and interior design firm with offices in New York, Philadelphia; Boca Raton; Cleveland; and, Dallas.

KEY PERSONNEL RESUME

L. Kent Doss, AIA, LEED AP BD+C Principal

Kent Doss joins Array as a Principal with over 20 years of professional experience. Kent will be responsible for all phases of project delivery, from preliminary project planning through design and construction. He has served as project manager on many different engagements ranging from limited interventional modifications to large-scale buildings and campus-wide development. Kent has worked in the higher education and technology fields, but has made healthcare his primary focus. He efficiently and effectively delivers projects to some of the nation's top organizations that satisfy current operational demands, provide flexibility for future growth all while striving for the highest standards of design and staying within budgetary constraints.

Understanding the important of alternate delivery methods for complex projects, Kent has completed Stanford University's Center for Integrated Facility Engineering (CIFE) program for virtual design and construction. He has also completed projects using fast-track scenarios, Design-Build method, Design-Assist and Integrated Project Delivery (IPD) using BIM and 3D Modeling.
